SUMMARY

Full-stack developer and agentic AI engineer building autonomous multi-agent LLM pipelines with LangGraph, LangChain and n8n. Architected a 6-agent traffic incident command system at 0.34s end-to-end. Skilled in React, Next.js, FastAPI and real-time systems, with a focus on automating manual workflows into auditable, self-serve processes. Hackathon winner, 1st place.

SKILLS

Languages	JavaScript, TypeScript, Python, C++ , Java, SQL
Web	React, Next.js, Three.js, Tailwind CSS, Node.js, Express.js, FastAPI, Firebase, Socket.io, REST APIs, WebSocket
AI and ML	LangGraph, LangChain, MCP, n8n, RAG, Groq, Google Gemini, Whisper STT, scikit-learn, Tensor-Flow, PyTorch, MediaPipe, OpenCV, DBSCAN
Tools and Analytics	Git, GitHub, Docker, Postman, Power BI, Pydantic, Zustand, NetworkX, OSMnx

EXPERIENCE

NTS Global Nihon	Jun 2025 – Aug 2025
Full-Stack Developer Intern, Team Lead	Remote

- Engineered Firebase auth, Firestore security rules and session management across 2 production environments.
- Automated routine customer queries with 5 RAG-based Kaamigo chatbot modules covering 50+ interaction flows.
- Shipped real-time chat across 3 platforms with cross-device sync; led the intern team and merged 11 pull requests through structured Git review workflows.

PROJECTS

TrafficMind: AI Co-Pilot for Traffic Incident Command	Mar 2026
LangGraph, FastAPI, Next.js, Groq, Gemini	

- Architected an autonomous 6-agent LangGraph pipeline (Signal, Routing, Alert, Density, Narrative, Supervisor) with parallel fan-out and supervisor fan-in orchestration.
- Automates slow incident triage: streams a 250-segment road network via OSMnx on 5s WebSockets with RAG-grounded SOP retrieval across 12 documents, at 0.34s on Groq Llama 3.3 70B.

Kontexo: Agentic MCP Gateway	2026
LangGraph, JSON-RPC 2.0, Celery, Redis, ChromaDB	

- Engineered a JSON-RPC 2.0 MCP server exposing 19 tools across GitHub, Slack, Sheets and Trello, driven by a 10-node LangGraph state machine.
- Automates manual tool-by-tool coordination: one plain-English prompt drives a multi-step workflow, gated by human approval.

VaquaH: HVAC and Cooling Services Platform	Oct 2025 – Present
React, Node.js, Express, Firebase, Razorpay	

- Launched a production e-commerce platform with 50+ products, smart search, coupon system, tiered shipping, Razorpay checkout and COD partial-advance logic.
- Automates phone-led ordering and scheduling into self-service via 8 service modules and a RAG chatbot with voice and gesture control.

HetChat: Real-Time Messaging Platform	2025
Built a chat platform on React, Node.js and Socket.io with Firebase Auth, Firestore persistence, typing indicators and presence tracking.	

Portfolio: RAG-Backed Personal Site	2026
React, Vite, Three.js, Node.js, Express, NVIDIA NIM, Render	

- Built an interactive site with a procedural Three.js 3D scene and a vector RAG agent searching 116 indexed knowledge chunks drawn from GitHub repos, LinkedIn posts and resumes.
- Automates its own upkeep: a nightly GitHub Actions job re-scrapes and re-embeds the knowledge base, with multi-model fallback, 12-turn memory and per-IP rate limiting for uptime.

ACHIEVEMENTS AND POSITIONS

Hackathon Winner, 1st Place: Aetrix 2026, PDEU	Mar 21–22, 2026
Won 1st with TrafficMind in Smart Transportation as Team 2AM Coders, over 36 hours, judged across all 3 evaluation phases.	

Student Coordinator, Swayam: The Entrepreneurship Club, IMNU	2026–2028
Responsible for Administration, Public Relations and Event Management.	

EDUCATION

Nirma University, Ahmedabad Integrated B.Tech (CSE) and MBA	2023 – 2028 • CGPA 7.13/10
